Summary:

• **Programming Languages** : C++ , Java

• **Web Development**: Html , Css , Javascript

  Developing expertise in frontend and back-end

  development.

• **Problem Solving**: Adept at applying Data Structures and Algorithms to solve complex

  issues

• Artificial Intelligence: Basic concepts in Generative AI, supervised, and unsupervised

  learning

Projects:

• **Personal finance manager website** [LINK]:

Tech stack : Html, Css, Javascript, Java, SQL

 - Designed and developed a user-friendly Personal Finance Manager using HTML,

CSS, and JavaScript for the frontend.

- Implemented secure backend functionality in Java for efficient financial data

  management.

- Integrated features such as expense tracking, budgeting, and financial goal setting.

- Ensured seamless communication between frontend and backend using RESTful API

  principles.

- Incorporated data validation and authentication mechanisms for user data security.

- Applied responsive design principles for accessibility across devices.

- Collaborated with a cross-functional team throughout the software development

  lifecycle

Education:

- **SRM Institute of Technology,** Tamil nadu

  Bachelor of Technology - BTech, Computer science with specialization in Information Technology(2022 - 2026)

- **Manas Bharti School,** Nawada,Bihar India || Higher secondary education (2020-2022)
